HELIUS HOOD

SAWO Helius heaters can be installed in a recess area in your sauna room. This way the heater is hidden and away from the bather. A basin is provided where you can pour water that goes into the stones to create steam. This makes Helius heater safe from accidental burns.

Helius Hood decreases safety distances and thus increases valuable sauna room space.

Code: HP68-008
Size: 225 x 860 x 255mm
